1927 ESTIMATES OF POPULATION FOR THE UNITED STATES

The following estimates of population for the United States and the several states as of July 1, 1927 have been made by the U. S. Bureau of the Census. The total for the United States is based in part upon the available data regarding births, deaths, immigration and emigration. The population for the several states is arrived at by distributing the total increase for the United States since 1920 on the basis of the distribution of the increase between 1910 and 1920, except that no estimates are made for those states which showed a decrease in population from 1910 to 1920, or 1920 to 1925, the figure given in such case being the population in 1920 or 1925.

INDEX OF CITIES AND TOWNS

This alphabetical list of cities and towns gives statistics of population based on the latest official census reports. Each line begins with the name of a place, followed by the name of the country or state, the population, the index references and the plate number. The index references indicate the location of the city or town on the accompanying map plates, as explained on page 1. Where a place may be known under different names or by various spellings of the same name, the different forms have been inserted to a large extent, in the index. This applies particularly to the new states of Estonia, Latvia, Lithuania, Czechoslovakia, and others where bilingual names of the same place exist. Where the same place name occurs two or more times within one country, each is followed by the name of a minor political division in italics.

Where space on the map has not permitted giving the complete form of a name, the extended form is shown in the index. Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list and their situation on the map, in each case, may readily be determined by means of the index references.

Capitals of countries and states are designated by asterisks *. Populations of cities, including suburbs, are designated by daggers†.

INDEX
CITIES AND TOWNS OF THE UNITED STATES

LATEST POPULATION

In this compilation are given the official population figures for all incorporated cities, villages and boroughs according to the latest Federal (1920) or State (1925) Census. For unincorporated places which are not separately enumerated by the Census, recent estimates supplied by local officials or other reliable authorities, are given.

Capitals of states are printed in capital letters, and places having one hundred or more inhabitants are named. The index references enclosed in parenthesis, indicate location of city or village on the accompanying maps.

Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list and their situations on the map, in each case, may readily be determined by means of the index-reference letters and numbers.

INDEX OF DOMINION OF CANADA

LATEST CENSUS

Capitals of provinces are printed in capital letters. The index references enclosed in parentheses, indicate location of city or village on the accompanying maps; those marked with an asterisk (*) refer to maps of Ontario, Northern Part.

Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list and their situations on the map, in each case, may readily be determined by means of the index-reference letters and numbers.
